Today

By Arthur
The Chicago Daily News celebrates its fiftieth anniversary, and all congratulate the late Victor Lawson and the living Melville Stone on the useful newspaper they gave the world. The Chicago American, which has the Daily News for its only work while competitor, also feels cheerful, in spite of its youth. Selling at three cents a copy five days a week and five cents on Saturday, against the Daily News' uniform price of two cents, the American circulation leads the Daily News by seventy thousand daily.

MR. BOK, able, winning, young
American, born in Holland, says this nation ought to be in the League of Nations and changes his opinion liberally, which is his right. He accepts the World Court as a desirable first step toward the League.

Another able American, born here, named George Washington, thought this country ought to keep out of European entanglements. He fought his way through one entanglement, and did not want any more.

BUT WASHINGTON is dead, not clearly remembered in these quarters. Mr. Bok is alive, with money to spend. You remember about the "live dog and the dead lion." You will learn from this advertisement what it

children of dead Washington, as compared with a live Bok.
TWO BABIES were born in Chicago taxicabs yesterday. The former emperor of Germany was almost born in a stage coach while his mother, daughter of Queen Victoria, was traveling. A village doctor, frightened by the announcement that he must be careful of the heir to the Prussian throne, put his hand, pulled on the unborn baby's arm, causing a deformity still existing.

THAT STORY was told this writer by the great French doctor, Bruunaquard, who went to Windsor Castle, at Queen Victoria's command, to see the child's deformed arm, some time later.

Bruunaquard added that any good doctor would have cured the deformity, but fifty doctors were too many for the poor child.

Another able American, born here, named George Washington, thought this country ought to keep out of European entanglements. He fought his way through one entanglement, and did not want any more.

COMBINATIONS make savings possible. The public should have brains enough to encourage big combinations.

Martyr to Science Loses One Arm

X-RAY EXPERT DEFIED DEATH TO CARRY OUT WORK FOR PATIENTS

A martyr to science lies in the Massachusetts General Hospital.

Dr. John A. Day, of Waltham, has a fighting chance for life, but in any event his right arm is gone and three fingers of his left hand. He is the victim of the deadly effects of working under X-rays.

Dr. Day, who is fifty-five years old, has long been known as one of the best X-ray specialists in the East. He had been frequently warned that continued work with the rays might do him lasting injury, but he continued in the interest of science and for the benefit of his patients.

Both hands became affected and he was taken to the hospital. Today it was considered imperative to amputate one arm at the shoulder and three fingers of the other hand in a desperate attempt to save the physician's life. The physicians are not yet sure whether their drastic attempts at cure will stand.

DYNAMITE AND BLOWUP THREAT LEFT AT MILL

WILMINGTON, Jan. 7 (U.S.A.)—Four sticks of dynamite were found in front of the property of the American Thread Company here, yesterday, according to information made public today.

With the dynamite were two small red caps, "Call it quits, or up goes your mill." On the other was written the single word, "Warning."

Two of the sticks were found close to the main office building of the company, and the other two were near a house owned by the company.

The American Thread Company was forced to close down on March 10 last when the majority of its employees here went on strike as a protest against a reduction in wages.

After the mills had been closed for many weeks operations were resumed under protection of State police and employees were brought here from out of town.

Company officials and the police suspect that extremists are responsible for the placing of the dynamite.

JEALOUS WIFE BURNS ACTRESS WITH VITRIOL

San Francisco, Jan. 7 (U.S.A.)—Her face scarred with vitriol, Edna Granger, twenty-two-year-old star of the Premier Ice Review, was today preparing to take legal action against Mrs. Mabel Mayer, who is said to have thrown a vial of acid into the face of the pretty actress.

Last night, according to Miss Granger, Mrs. Mayer came to the Turpin Hotel and insisted that she was the wife of Granger's husband, saying she wished to talk to her.

Then, Miss Granger said, Mrs. Mayer pulled the vial of acid from her handbag and dashed it into her face, saying "You'll never break up another house; I'll mar you for life."

Miss Granger declared Mrs. Mayer was violently jealous of her husband, Les Mayer, producer of the show in which the disgraced actress was playing.

"There was absolutely no foundation for her jealousy of me," Miss Granger said today. After the acid-throwing episode, Mrs. Mayer went to the police station and surrendered.

WEDDING BELLS PEAL FOR 'MISS BOSTON'

MISS MARGARET BLACK of Boston, chosen "Miss Boston" of the 1927 Atlantic City beauty pageant, is on her honeymoon today, the wife of Milton W. Trusk, a Detroit auto-motive dealer.

Announced at the wedding, which took place in Detroit on December 31, was made today.

"Peggy" Black was chosen as the queen of Boston beauty in a contest conducted by the Boston Evening American, and she was crowned the last to be eliminated.

After she became the bride, she turned the moving picture company.

The bride was presented with a diamond ring and a diamond bracelet by her husband. The couple left for a three-month honeymoon in Honolulu, to be followed by a trip to Europe.

Black, of Dorchester, has been a model wife and mother, and her husband, who is an automobile dealer, was a member of the Boston City Club.

The bride was given away by her mother, Horace Black.

Margaret Black, bride of Milton W. Trusk.

'GET OUT OR BE PUSHED,' IS WARNING BY NICHOLS

The new boss will sweep city under certain department heads, holdovers from the Curley regime, had in their resignations.

Cardinal Mercier revealed today that the patient waiting for the resignation is the reason why the expected purge of section heads at City Hall did not take place when he was in office. He is surprised that appointive officials have not been resigning in order to give him the chance to reorganize his official family in peace.

"When a man is doing good work, he may be removed if it appears that another man will better

JAZZ KING AND BRIDE NOW PLAN TO RE-WED IN CATHOLIC CHURCH

New York, Jan. 7 (U.S.A.)—Irving Berlin, the jazz king, settled close to a million dollars upon his bride, the former Ellen Mackay, society debutante, as a wedding present, according to intimate friends of the couple today.

This became known shortly after publication of reports that the bride's father, Clarence H. Mackay, head of the Postal Telegraph Company, had made a new will, cutting his daughter off from his estimated fortune of \$300,000 without a penny.

It was further reported that Mackay had ordered his daughter's effects removed from the family mansion at Ruston, N. Y., and sent to Berlin's apartment here.

Berlin, the latest reports had it, gave half his personal fortune of nearly \$2,000,000 to his young wife when he learned of the disinheritance.

With an additional \$200,000 from Mrs. Berlin is to receive from her grandfather's estate when she becomes 21, she will be well off in her own right. She is now 22.

The honeymooners, obviously happy, were in New York today, having returned from their brief trip to Atlantic City.

The bride planned to attend the wedding of her friend, Canada Varuchitt, to Earl R. T. Smith, at Vanderbilt mansion late this afternoon. There was a possibility that she would meet her father at the reception, as his too, has been in town.

Her mother, Mrs. Joseph Mackay, of a noted paper, was expected to come to New York during the day from her home in Livingston, N. Y., to greet her daughter.

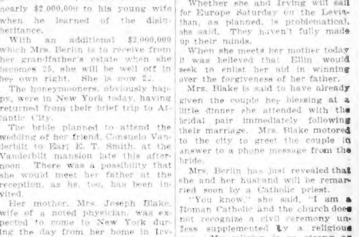

Mrs. Berlin said she and Irving will immediately return to Atlantic City, where she has arranged a party at the Ritz-Carlton Hotel for their guests at which her husband, who is a Jew, will be present to her friends.

Whether she and Irving will sail for Europe Saturday on the Levant, as planned, is problematical, she said. They haven't fully made up their minds.

When she meets her mother today it was believed that Ellen would ask to visit her old home in Washington, D. C., where she was born. Mrs. Blake is said to have already given the couple half her fortune at a little dinner she attended with the local press immediately following their marriage. Mrs. Blake returned to the city to greet the couple in answer to a phone message from the bride.

Mrs. Berlin has just revealed that she and her husband will be remarried soon by a Catholic priest.

"You know," she said, "I am a Roman Catholic and the church does not recognize a civil ceremony unless supplemented by a religious one. My religion is as strong as

'I'LL DO IT AGAIN,' SAYS EVELYN THAW

Chicago, Jan. 7 (U.S.A.)—Evelyn Nesbit Thaw plans to die by her own hand as soon as she gets out of the hospital where she now is, following a serious stroke during the night.

"I'm sick of living," she told Dr. Amanté Bonquet, head of the medical team, who is bent on saving her.

"You might as well let me die," she retorted. "I don't want to get well. If I get well, I'll do it again anyway, and do it with something more complicated. I'll do it where no one will find me and give me an antidote."

PICTURE ON PAGE 2.

CARDINAL MERCIER IS BELIEVED NEAR DEATH

Brussels, Jan. 7 (U.S.A.)—Cardinal Mercier, Belgian prelate, took another turn for the worse today following a serious stroke during the night.

The last sacraments of the church have been administered and there is little chance left for his recovery.

Cardinal Mercier underwent an operation for stomach trouble about a week ago. He had been reported as showing rapid improvement.

Cardinal Gasquet Is Reported as Improved

Rome, Jan. 7 (A.P.)—The condition of Cardinal Adrien Gasquet, archbishop of the Vatican, Italy, who is so seriously ill that small hope has been entertained for his recovery, was somewhat improved today after a restless night.

Mr. de Gaulle, passing through Rome on his way to England, sent a secretary to inquire about the cardinal's condition and to express hopes for his recovery. Cardinal Gasquet is English.

The American's Paid Circulation Is More Than 75,000 Greater Than That of Any Other Boston Evening Paper

ARKWRIGHT CLUB IN NEW ATTACK ON 48-HOUR LAW

MOVES FOR LONGER WEEK IN MILLS

Would Have Women Work 54 and Children 48 in the Textile Plants

The annual attempt of the Arkwright Club, an organization of textile manufacturers, to break down the forty-eight hour law for women and children in industry was uncovered today with the filing of a bill at the State House by William F. Garcelon, counsel for the club.

Under the terms of the measure, women would be allowed to work ten hours a day but not more than fifty-four hours a week. Children would be permitted to labor nine hours a day but not more than forty-eight a week, except in manufacturing establishments where employment is seasonal, where a fifty-two-hour week would prevail.

The weekly average for the year is not more than forty-eight hours.

If a woman or child is employed in more than one establishment where the employment is seasonal, the women would be permitted to work fifty-four hours and the child forty-eight in any one week.

A statement accompanying the bill declares that the present forty-eight hour law is working a great hardship on the cotton industry.

HUB NIGHT CLUB IS CLOSED

Another night club passed into history today when Frederic W. Cook, Secretary of State, revoked the charter of the Ararat Social Club, Inc., of No. 12 Kensington street.

Mr. Cook said that one of the officers had been recently convicted of unlawful use of intoxicating liquor and that the same officer had pleaded guilty to a charge of violating the Alton firearms law. The latter charge was placed on file.

The Ararat Club was chartered on April 10 of last year for the purpose of "promoting social intercourse."

LASKY FILM FIRM SEEKS TO QUASH "TRUST" CASE

Washington, Jan. 7 (A.P.)—The Lasky Film Corporation and affiliated motion picture organizations asked the Federal Trade Commission today to dismiss, on the record made, the complaint charging a conspiracy to create a monopoly.

Government counsel had asked the commission to reopen its action in its case to take evidence as to the number of theatres acquired by the respondent and other developments in the industry since 1924. Both the government and the defense motions were taken under advisement.

GOV. BREWSTER HERE TO BOOST NEW ENGLAND

Advantages of New England will be extolled tonight at a meeting of the Boston City Club, by Gov. Ralph O. Brewster of Maine. He was met at the North Station today by Prof. Charles B. Broad, president of the Boston City Club. State and city officials, Gov. Brewster will talk on the advantages of Maine, over radio station WYAC at 8:30 o'clock before the meeting of the Boston City Club.

NINE LIVES SAVED IN HALF-HOUR BATTLE

Yowling of a cat, near strangulation in a culvert grating in Palmer street, Quincy, brought a crew of men from the public works department who spent a half hour rescuing the animal today. The cat, it is believed, was chased into a drain pipe by a dog, and in an effort to escape, squeezed its head through the grating.

L. R. Smith Under Knife

Worcester, Jan. 7 (A.P.)—Leslie R. Smith of Haddam, president of the New England truck show and past master of the State Grange, was operated on today in a hospital here for appendicitis.

"MATRIMONIAL PREPAREDNESS" PLANS NEED A LITTLE MORE YEAST

GLADYS DENSMORE From White River Junction, Vt. Came this girl to learn to cook, but it didn't suit her.

MARY MCGEE, LAMAR, MISS MCGEE, WATERBURY, CT. ERMA CARLSON, MICH. These girls, and others, went before the Middlesex Grand Jury with a suit at the Domestic Science School at Chestnut Hill when they thought something should be done about it.

ERMA ROGERS, NANTIC, CT. The Nantico, State sent several of its fair ones to the school.

SPIFFY GIRLS WEAR ROSES ON KNEES

For a hour time some silly persons have had an idea that less were meant to stand on, and to walk with and knees to kneel on and start runs in silk stockings, and so forth, but in, and behold (ridiculous expression) it was discovered today that knees are places for roses and flasks and things.

That is, pretty girls' knees! The roses on the knees are brand new with today, although with rolled stockings in a child wind, any girl's knees are liable to become rosy if they don't turn blue.

This story gets sillier every minute, just like the conductors' change 'tels, the girls also wear on the knee.

Powder puffs are another article that has been observed riding at the former entrance to the Franklin First National Bank, where, a "though now useless as a tank, the "riest rail is still great. The girls are wearing wrist watches on the knee which is a strange place for a wrist watch, but nevertheless very attractive.

So much stuff, in fact, do the girls tote around on the knee now.

To Be Old Maid

Helen Wills, United States national tennis champion, told reporters she would never marry when interviewed on her arrival in New York on route to Europe.

Admits that they can't help limp. Some take this to mean that it's possibly have water on the knee but, in the light of the flask, it's more liable to be Scotch.

Aren't girls a risk?

LABOMBARDE'S COUSIN WILL FACE TRIAL

Manchester, N. H., Jan. 7.—Charles LeFebvre, bright-eyed but underlined boy of fifteen years, brother-in-law of Louis Labombard, convicted murderer, will stand trial for first degree murder early in February.

Announcement to this effect was made as Labombard, found guilty of slaying Helen Gibbs, aged seventeen of Hudson, last July, was being taken to State prison at Concord to date to begin a life term at hard labor.

With the conviction of Labombard all hope of young LeFebvre's escaping the ordeal of facing a murder jury vanished. Since his arrest with Labombard the boy has been the center of well-meaning attempts to shield him from the ordinary forms of prosecution. He is now temporarily confined at the State industrial school here.

LeFebvre was named by Labombard in the latter's confession to the police. Labombard declaring that the boy killed Georgiana Gibbs while he himself killed Helen Gibbs. This confession was later retracted.

BEGIN FIGHT ON \$27,000,000 HUB LOOP

The first gun in the fight against the proposed \$27,000,000 loop highway for Boston, the immediate obstruction of which was urged by a special commission headed by Chairman Henry L. Harriman of the metropolitan planning division, was fired today in the House by Representative Henry L. Smith of Boston, chairman of the Committee on Ways and Means.

With approval of the committee in rule, Shattuck introduced an order calling upon the Harriman commission to furnish the house with all the facts and figures, reports and other information on which the cost of the undertaking was reached.

In arguing for the adoption of his resolution, which was placed in the order of the day for tomorrow's session, Representative Shattuck pointed out that the commission has dealt with the question of cost and the amount which will be collected in betterments in the briefest possible manner in its report. He said:

"The commission estimates that \$27,427,000 will be paid in land damages, but it gives no indication as to how this figure was obtained, or how accurate in each section of the route were figured."

"All we are told is that 'certain real estate experts' after detailed study, have given 'written opinion' that betterments to the extent of about \$10,000,000 can be levied."

"We do not know the identity of these experts, and we do not know the nature of the study which they gave to the question. Their written opinion was not presented to us."

Fast Worker

Evelyn Farris Bennett of the Follies and the films, who was divorced from her husband, Raymond, at Chattanooga, Tenn., and took out a license to remarry him the same day.

study, have given "written opinion" that betterments to the extent of about \$10,000,000 can be levied.

"We do not know the identity of these experts, and we do not know the nature of the study which they gave to the question. Their written opinion was not presented to us."

FIRE SWEEPS 4 STORES IN BLUE HILL AVENUE

Fire swept four stores today in Blue Hill avenue, Dorchester, and fanned by a stiff breeze, gave fire fighters a hard battle.

The fire originated at No. 118A, occupied by the Morton Hardware Company. A patrolman discovered the flames as they were spreading to the unoccupied store at No. 118A.

Before firemen got the fire under control, the meat market of Rosenberg & Weiner at No. 118, was damaged. Loss is estimated at \$2,500.

WOULD PERMIT FIN. COM. POWER TO PROSECUTE

Authority for the Boston Finance Commission to initiate court proceedings against officials and city employees accused of improper conduct or responsibility for losses in city finances is asked in a bill filed today with the Legislature by Representative Thomas E. Hildreth on behalf of the United Improvement Association. On petition of the Board of Trade, Hildreth filed a bill to give the commission legal authority to ask the courts to restrain illegal raising or spending of money or incurring of illegal debts.

OPPOSITION TO MERGER IN MAINE

Pine Tree State Citizens Still for Public Control of Power Sources

By DENIS KING

Augusta, Me., Jan. 7.—The State of Maine still is afraid of the "Power Trust" which at meeting of the word "supers power," and is ready to balk and run when anyone mentions "giant power."

This, at least, is the impression one retains after talking with a score of more legislators, former legislators and other citizens on the subject of the merger by which the Caribbe interests of New York, have come quietly into control of the New England Power Development in all the New England States except Maine and concerning the likelihood that Maine soon will be asked to add her own hydro-electric resources to the "New New England pool" which is talked about.

Maine is "from Missouri," on this question, and admittedly it will take a lot of missionary work to "show" the Maine people the way to that end.

The fact is that Maine, or so Continued on Page 22, Column 1.

FOLK DANCING

LITTLE CHARMER

International Hall, Broadway, will be the scene of the dancing of the International Club's charity ball. A spectacular affair, the ball, which takes place in the de-... of Canada, will be five years old. Mary A. Campbell will be the hostess. The ball will be held on the 15th of the month.

The proceeds of the dancing will be devoted to the relief of needy families of foreign Canadian. Frank Clark is chairman of the ball committee, while Mrs. Joseph S. MacKinnon is chairman of the reception committee.

MRS. QUIMET IS AMONG TOURISTS TO TROPICS

Mrs. Francis Quimet, wife of the Boston agent, was among the party of Bostonians and New Englanders who sailed out of New York today in the United Fruit liner Siskia for a trip into the tropics. The vessel calls at Kingston, Cristobal, Caracas, Puerto Colombia and Santa Marta. Officers aboard were: Mr. and Mrs. H. A. Thayer, Mrs. Florence Crowe, Miss Jennie M. Sato, Miss A. E. Calloutie, Miss Lillian M. Smith, Mr. and Mrs. W. J. Sargent, Miss Catherine Sugden, Master John Sugden, Mrs. Catherine Sugden, Mr. and Mrs. A. L. Robinson and P. Sugden, of Boston; Miss Jessie Luther, Providence; Miss Grace M. Isaacs, Wrentham; Miss E. M. Prescott, Quincy; O. Howard Frost, West Newton; Shaler W. Denton, Waltham; Edgar T. Walker, Belmont; Mr. and Mrs. G. H. Sumner, Canton; Mr. and Mrs. H. G. Thayer, Worcester; and G. Bradford Foster of Cambridge.

POTATOES KEEP RIGHT ON COSTING BIG MONEY

Despite reports from Chicago that the peak of high prices on potatoes was reached last week, and that they were slowly approaching a point where they are within reach of the ordinary pocketbook, the Boston market has failed to register any change.

Buyers declare there is no drop in the price, and people must pay 80 cents a peck and upward the same as during the last fortnight.

The Gilchrist Co.'s advertising has been on this page almost daily for two years. Now, so that this page may be devoted entirely to news, the Gilchrist Co.'s advertising will be found almost daily on Page 5.

KNEES CAN "PUT OVER" MORE THAN THIS--WHAT'S YOUR PET?

Fair enough, but the giver doesn't get even a thing. Might be handy at a movie for one who knows the Braille system. A bargain, of course, or 'tould be even more. Men will get it somehow, in spite of Vaseline, but cooperation is needed to get the joy out of this. Almost the "Best in Boston," and "No" ought to feel good.

WAR FLEET TO SAIL FOR CUBA

Boston Navy Yard hurried up preparations today as two extra-five destroyers and an off-tender were ready to sail tomorrow for Guantanamo Bay, Cuba, to take part in the Winter maneuvers of the Atlantic fleet.

Aboard the cruiser Detroit, the ship of the third division, will be Admiral Arthur L. Williams, commander of the fleet. The off-tender will weigh anchor at 1 o'clock and will stop at Hampton Roads, Va., on the way to the station. The destroyers, Chicago, Oberon, and the off-tender, will be the remainder of the fleet.

Fatal Fall

BABY POISONING CASE IS AGAIN CONTINUED

The case of Andre De Miller, charged with attempting to poison his baby daughter, Victoria, was

continued in Roxbury Court today as the man is still being held for observation at the Psychopathic Hospital. The charges against De Miller is that he put poison in the baby's milk. Analysis showed, according to the police, that he had

JORDAN MARSH ENTERTAINS PATRONS

Boston Social Set Cast Scores in Dickens Story at Second Anniversary Event

Characters drawn by the pen of Charles Dickens stepped forth from the pages of "Pickwick Papers" and enacted "The Christmas party at Emley Hall," as the feature of the second program of the diamond jubilee of the Jordan Marsh Company in the crowded assembly hall of the store.

Produced under the direction of Burnside J. Hawkins, store manager, and enacted by a large cast from Boston's social set, under the auspices of the Boston Dickens Fellowship, Edward F. Payne, president, it brought to the audience the true atmosphere of the days when B. D. Jordan and Benjamin L. Marsh were striving to make a place for their store among the leading mercantile establishments of the city.

The cast was composed of Sherwin Lawrence Cook, Mrs. Robert M. Reed, Miss Florence C. Smith, Miss Bertha E. Tuttle, Mrs. Mary Lee Bagley, Paul J. Chase, Harry M. Hight, Edward J. Cox, William J. Dana, Frank W. C. Hovey, Charles J. Rileyway, Leon Eastman, John Edward Hansen, Dr. William Milligan, Mrs. Harry M. Hight, Miss Edna Stinson and Miss Louise Stinson.

The Jordan Marsh orchestra played a prelude of old English tunes mentioned in the story. Miss Carrie B. Sherrill sang, "Long, Long Ago," "Gaily the Troubadour," and "The Ivy Green."

The program was opened by the orchestra playing the Diamond Jubilee March. The words were written by Manager Hawkins and the music was composed by William J. McNulty, of the staff.

Tomorrow will be known as Boston and Jordan's Day. Miss Maria A. R. Shannon will give a lecture with slides of old Boston and the old Jordan store. Mrs. B. H. Wheeler will be seen in an 1860 dress introduction.

The grand Diamond Jubilee party given to all employees will be in Mechanics Building Saturday. Address will be given by Governor Fuller and Mayor Nichols and made by the

DICKENS' PROGRAM AT JORDAN-MARSH

MISS CARRIE SHERRILL. DR. WILLIAM MILLIGAN
Wearing a gown made in the South which one of her family wore at the ball in honor of the Prince of Wales in the Old Boston Theatre in 1860, Miss Carrie C. Sherrill, was in the Dickens Day cast. She is shown as Marion Lobb in the play with Dr. William Milligan as the clergyman.

Diamond Jubilee Band, under the direction of John B. Fiddling.

Dr. Thomas Lilly Dead
For twenty-five years a practicing physician here, and today following an attack of erysipelas, Dr. Lilly came to his end at Lawrence. He was chairman of the board of selectmen and the board of health.

FIGHT ON PHONE RATES OPENED BY SULLIVAN

Boston Attorney Confers With I. C. C. in Washington for Date of Hearing

With the flurry of changing municipal administrations over, B. Stern Sullivan, appointed special counsel for the city by ex-Mayor Currier, opened today in Washington the fight of official Boston against high telephone rates.

The special counsel conferred with chairman Eastman of the Interstate Commerce Commission and with Commissioner Steyer relative to the telephone hearing which has been presented by the I. C. C. Charges that the Bell Telephone system is an absolute monopoly that the American Telephone & Telegraph Company is owner of the New England Telephone & Telegraph company, and that big profits of the monopoly have gone to bankers, were made to the commissioners to try by Sullivan.

"I desire at this time," he said, to reach some agreement with the commission as to the time and place of hearings, and to learn whether it can obtain some statistical information from the telephone companies concerned, through interrogatories.

SOVIET ARRESTS CHURCH HEADS IN 'PLOT'

Metropolitan and 17 Bishops Accused of Planning Revolution

London, Jan. 7 (AP)—Staretzky, Metropolitan of Pskov and seventeen bishops of the Russian Orthodox Church have been arrested in Moscow for refusal to recognize the "piling church," according to a Berlin dispatch to the Daily Mail.

Metropolitan Staretzky is charged with having organized the "Black Hundred," a counter-revolutionary organization. The charges were first made against the metropolitan in the Pravda on November 15, and, after he had failed to refute the charges, his arrest was ordered.

A temporary council of six bishops, headed by the Archbishop of Leningrad, has been organized to govern the church until a new metropolitan is elected.

The case of Staretzky may become as famous as that of his predecessor, Tikhon, whose imprisonment for alleged counter-revolutionary activities caused world-wide protest.

ENTRY BLANK GOLD AND SILVER SKATES JUBILEE RACES

UNDER AUSPICES BOSTON EVENING AMERICAN

I hereby enter my name as a contestant in the Gold and Silver Skates Jubilee Races:

My Name Is

My Home Address Is

(Street and Number)

My Age Last Birthday Was Years

Fill this out and mail to Gold Skates Editor, 5 Winthrop Sq.

GOLD SKATE RACERS PRAY FOR COLD WEATHER

The youth of Boston is preparing for cold weather and the opportunity to practice for the Boston Evening American's Gold and Silver Skates Jubilee Races.

All you have to do is to read the rules carefully and then fill out the entry blank that is published with the articles about the races. Then send to the Gold and Silver Skates Editor, Boston Evening American, Winthrop square, Boston.

There's no admission fee to participate in the races. You may be entered in your class in which you become the skater on one of the gold skates given by the Boston Evening American, or you may be in second place and win silver skates.

PUSH ALONG ENTRIES.

Keep reading the daily articles in the Boston Evening American after you have sent in your entry and you will know all about the class in which you belong, and what is equally important you will find out when the elimination races for your district will take place.

Here are the rules for the different classes: 20 yards for boys under 14; 40 yards for girls under 14; 40 yards for boys 14 to 16; 40 yards for girls 14 to 16; 80 yards for boys 16 to 18; 80 yards for girls 16 to 18.

Watch for the elimination dates. The first West Roxbury district entrants the elimination date is already set. The races will be held at the Fiddlers Field, West Roxbury, on January 16. And your entry must be in the hands of the skates editor on January 11.

DORCHESTER RACES.

All West Roxbury children must enter this race if they wish a chance for the gold and silver skates. Children who live in the South End or Roxbury may compete in the Fiddlers Field or wait for the Dorchester elimination, the date of which will be announced later. All Dorchester entrants must compete in the Dorchester elimination.

East Boston rivals must compete in the races conducted there, date to be announced later, and those living in Charlestown, or South Boston must compete in the races to be held in those districts.

Those entrants who live in the North End or West End have their choice of competing either in the races at East Boston or Charlestown, Brighton and South Bay boys and girls will go to Franklin Field.

CHARGES PLOT TO BLOCK N. E. PACIFIC TRADE

Washington, Jan. 7 (A.P.)—Much of the losses claimed by the railroads can be traced to rates made to stifle water competition, it is alleged.

General Thomas H. Ashburn, head of the government Mississippi Valley, declared today before the Senate Interstate Commerce Committee, during examination of the Coudine bill, which would prevent the charging of higher rates for short hauls than for long hauls, he said that section would cause the railroads to turn their energies from destroying water competition to the development of the interior portion of the country.

It was not fair, he said, for the railroads to make low rates on long hauls in order to meet water competition and then penalize certain sections of the country with high rates on short hauls to make up the deficit.

Speaking for the Interstate Commerce Association of the International Union, James A. Ford of Spokane, Wash., said that Chicago manufacturers and shippers are asking that New England be removed from trade with the Pacific Coast and that the Panama Canal be eliminated as a factor in coast-to-coast transportation.

Ford urged passage of the bill as the railroads might be prohibited from returning to what he characterized as the discriminatory practices in force up to the time of the World War.

He said railroads, backed by Chicago manufacturers and shippers, now are seeking to charge a much lower rate on basic commodities from Chicago to Pacific Coast terminals than from the same city to intermediate points.

BOSTON FOLK SAIL FOR MIAMI AND THE WEST

In two big liners out of New York today a number of Bostonians sailed for Miami and Pacific Coast ports.

In the Panama Pacific liner Finland, for San Diego, Los Angeles and San Francisco, were Mr. and Mrs. W. H. Perrell, Mr. and Mrs. W. C. H. Perrell, Mr. and Mrs. F. H. Perrell, Mr. and Mrs. Charles C. Monte, Miss Dorcas Monte, Mrs. W. C. H. Perrell and Miss Helen Hutchinson of Boston, and Mr. and Mrs. Fred A. Perrell of Melrose.

Aboard the Kronland for Miami are Mr. and Mrs. C. H. Perrell, H. J. Colburn and A. W. R. Dillings of Boston, and Frederick Kimball of Stamford, Ct.

ROXBURY AUTOIST HURT IN CRASH WITH ELECTRIC

When his automobile collided with a street car today at Washington and Monroe streets, Bridget, Edward Crowley of No. 101 Tremont street, Roxbury, was injured and the automobile was wrecked. Crowley was taken to St. Elizabeth's Hospital suffering from cuts and bruises. The automobile skidded into the path of the car.

Greater Than Ever

ONE of the last published expressions of Frank A. Munsey was a statement regarding the advertising lineage in The New York Sun during the month of November.

That statement was so characteristic, so clear and concise an expression of the ideals controlling The Sun that it is reprinted in full below.

To the perpetuation of those ideals the present management of The Sun is unreservedly committed and pledges itself to their completest fulfillment.

It is for the same reasons expressed by Mr. Munsey that The Sun continued in December to add to its record another month of leadership, thus completing a period of six consecutive months in each of which it has published a greater volume of advertising than any other New York evening newspaper.

The Sun published in December 1,571,906 agate lines of total advertising—leading the second New York evening newspaper by 132,656 lines.

The Sun's advertising gain in December—a gain of 223,710 lines—was larger than the combined gains of all the other New York evening newspapers.

During the last six months of 1925 The Sun published 7,693,384 lines of total advertising—leading the second New York evening newspaper by 388,004 lines.

The Sun had a larger gain during the last six months of 1925 than all the other New York evening newspapers combined.

Month after month and year after year National Advertisers use far more space in The Sun than in any other New York evening newspaper.

Reprinted from The Sun of December 5, 1925

Character, Substance, Courage, Quality.

THAT'S the reason for The Sun's position in New York as a great newspaper—a home newspaper for home reading.

That's the reason why The Sun leads all other evening newspapers in New York, both in the quality and quantity of its advertising.

That's the reason why The Sun carried in November 1,541,154 lines of advertising, leading all other evening newspapers in New York by 58,664 lines.

That's the reason why The Sun for five months straight has carried more advertising than any other New York evening newspaper.

That's the reason why The Sun has made a larger gain in the last five months than all the other New York evening newspapers put together.

That's the reason why The Sun's gain in advertising for November this year is 334,424 lines over November last year.

That's the reason why in the last five months The Sun has gained more in advertising in the six working days of the week than any other newspaper in New York, morning or evening, has gained.

The Sun is building right, building with full appreciation of a newspaper's responsibility to the community

The Sun
280 Broadway New York

The terms of Mr. Munsey's will make it possible for The Sun to assure its readers that they will continue to enjoy a clean newspaper of interest, political independence, honesty and fearlessness. The organization with which Mr. Munsey brought The Sun to its present commanding position remains intact. That organization will bend every effort to make The Sun a newspaper worthy of its readers and its late owner.—*Editorial in The Sun, December 31, 1925.*

BOSTON RADIO AMERICAN

VOICING THE GREAT AMERICAN DEMOCRACY OF THE PAIR

Local stations have prepared an excellent program for this evening. WNAV presents the St. Mark's Quartet, followed at 8 o'clock by Cecil Saunders, vocalist, with an assisting artist. WEEL will be on the air with a solid three-hour program from New York, commencing at 8 p. m.

HOOVER DENIES RADIO CONTROL

Fan mail has been coming in from all over the country, and the Bureau has been receiving a great deal of correspondence from the public. The Bureau has been very busy, and the public has been very kind to write to the Bureau. The Bureau has been very busy, and the public has been very kind to write to the Bureau.

The Bureau has been very busy, and the public has been very kind to write to the Bureau. The Bureau has been very busy, and the public has been very kind to write to the Bureau. The Bureau has been very busy, and the public has been very kind to write to the Bureau.

New Daily SLEEPING CAR TRAIN

Boston and Hartford

Beginning January 17, 1926

To serve the large number of business men and travelers between the two state capitals with sleeping car facilities, a daily train will be operated between these two points.

Business routes will be greatly benefited as travelers will not have to make an unpleasant journey and

be able to sleep in a comfortable and convenient

car.

For further information, apply to the Boston and Hartford Sleeping Car Train, 100 North Street, Boston, Mass.

Rupture Can Be Healed

Science Finds Heals Without Operation, Delay or Danger

New Discovery Seals Rupture—Masters Human Scourge Which Defied Doctors for Ages. Thousands Tell of Amazing Results; Safety and Cleanliness Assured.

Try This New Way At Our Expense

So Light, Small and Comfortable in This New Invention, It Can Not Be Noted Even When the Wearer Is Clad in Tights. Several Dancers, Sufferers from Rupture Due to the Unusual Exertion, Have Been Healed by New Discovery.

Rupture can be healed. Medical science, studies investigation, combined with modern inventiveness has devised a method which actually seals rupture. For ages, the healing of rupture, or hernia as it is known medically, has been the aim of countless physicians and surgeons.

Investigations into the life and body afflictions of ancient, disclose that in days, when history was noted on tablets of stone, rupture was known and even then priests of that time, were sincerely trying to effect a cure. Trusses, as the implements which hold or retain the rupture are called, were in use at that period in history, but like the modern truss they held the rupture but failed to assist nature in healing the wound.

The ancient's attempts at healing were mere gropings, as they knew nothing of the circulation of blood and its effect on body tissue and body growth. The various phases of growth were mysteries which they were unable to fathom. Since Sir William Harvey, an English scientist of the early century, discovered that blood really circulated through the body, ending living materials to all parts of the human system, the path of the rupture scientists has been more easy to follow.

They attempted to find, if possible, some method of retaining the rupture safely, yet something which would allow free circulation of blood and not irritate the edges of the hernia or rupture and which would heal the tear.

Assists Nature to Heal

This has been done. Experiments carried on for more than 20 years has resulted in the perfection of an appliance, light, safe, conformal in every way, which assists nature and really seals the rupture. An additional improvement has been the entire appliance, which weighs less than two ounces, can now be removed in water, without irritating, eliminating all body odors, irritations and causes of skin blistering. The announcement was withheld for some time, so that thousands of experiments which had been carried out in all sections of America, England, Canada, and Germany could be investigated and the condition of those observed at frequent intervals.

These investigations have been made and it has been found that a great number of cures have been effected. That the cures have been permanent ones, is attested by letters written by the people themselves and sent to the offices of those who perfected the new rupture appliance. These included people in every walk of life, people who make their living by hard work, where strains, heavy lifting and constant muscular effort is necessary. Others include society women, world-famous women in moderate circumstances. The cures have been general in all classes.

Heals the Aged

In their zeal to prove the worth of the new process, men and women of advanced years were selected and their experiences recorded. A probe showed that even in this class, a great number of permanent cures had resulted, where the patient followed closely the instructions of the experts.

To really understand what this great discovery and these years of experimenting and testing mean to humanity, it is almost necessary that a full description of the new method be given. Like all inventions and discoveries of science, its method of healing is based on logic and upon a keen knowledge of the subject. A rupture or hernia, as it is known in medical science, is literally a tear or a separation of the muscle fibers in the walls of the abdomen. This separation is caused by a heavy strain, a violent jerking or unusual exertion. The fibers separate and allow a portion of the intestine to protrude through the opening. This results in a small knot or knob on the wall of the abdomen.

Before the investigation, which resulted in the discovery of this new method of healing, there were but two courses open. A physician or surgeon could be called and an operation performed or the patient or sufferer could seek some sort of comfort from a truss, which pushed the protruding intestine inside the body.

The operation was expensive and dangerous, with the outcome a doubtful thing.

All the surgeon with his knife, could promise to do, was to bring the edges of the torn section together and sew it, then await the action of nature and allow growth to renew the torn sections.

Truss Is Inefficient

If the truss was called to service, the hard leather knob was forced into the tear, where constant irritation wore thin the edges of the wound and the hard pressure prevented proper blood circulation. The sufferer was forced to resign himself to a lifetime of rupture suffering, never free from the harness of the truss. No hope was held out by scientists, that his rupture would ever cure itself, although many manufacturers of appliances contended that such a thing was possible, scientific investigation showed that it was impossible to heal the rupture as long as the heavy pad was being pushed into the rupture.

Sir William Harvey, English Scientist, Whose Discovery of the Circulatory System, Assisted so Greatly in Perfection of New Medical Discovery Which Heals Rupture.

opening, separating the edges of the tear and wearing thin, the edges of the torn section.

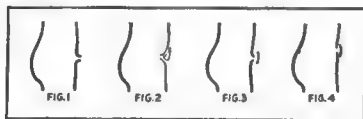

The heavy springs in the usual truss pressed into the body, many times injuring the kidneys and causing irreparable damage to the back, where the heavy steel pressed into the tender nerves, controlled by the spinal column. Besides this, the cruel was the old-fashioned truss, it was impossible to sleep in the apparatus, with the result that it sleep many times, the rupture "came out" and even a doctor was unable to replace it. When this happened, an immediate operation was necessary. If the life of the patient was to be saved, Peritonitis would result in 24 hours if the rupture strangulated or could not be replaced. The old truss was not washable; it caused skin irritations and the dirt which accumulated caused a feverish condition which retarded the cure.

The great number of rupture cases among small children and babies made necessary some method which would eliminate forever the pushing and the dangerous operation and heavy steel encircling the body, injuring the delicate nerve centers.

Experiments Bring Desired Results

The experiments resulted in the discovery and perfection of the Brooks Appliance. C. E. Brooks, a resident of Marshall, Michigan, was ruptured. He was not a doctor but he was a well educated man. Rupture comes and rupture cures be-

Little Children, Rupture Sufferers, Whose Hope of Help Was Slight Until the Discovery of New Scientific Treatment for Hernia, Need No Longer Be Left Hanging Between Happiness and Despair, But May Now Look Forward to a Full Life, Free of the Handicap of Truss or Dangerous and Costly Operation. Their Tender Little Bodies May Now Be Whole Once More.

The Routine Drawing of a section of the abdominal wall shows the New and Old Way to Which Rupture Was Treated. Until the Present Invention, a Heavy Pad or Knob Was Used to Force the Intestine Into the Rupture Opening. It Retained the Rupture but Made Healing Impossible.

Figure 1 Shows the Rupture Before the New and Old Healing Appliances are in Place and Figure 2 Shows the New Appliance in Place. Note (1) Nature in Which the Edges are Drawn Together in Natural Position by the New Discovery. A Strong Tie Rupture to Heal.

Figure 3 Shows the Rupture After the New and Old Healing Appliances are in Place and Figure 4 Shows the New Appliance in Place. Note (2) Nature in Which the Edges are Drawn Together in Natural Position by the New Discovery. A Strong Tie Rupture to Heal.

came his hobby and after many years he developed the appliance which now bears his name.

He soon found the deficiencies of the truss—the things it did to hinder cure and to retard healing. So he developed an appliance which did everything which the truss failed to do. With reverse force he treated the rupture appliance which resulted in the many cures daily.

Can Be Washed Daily

His appliance, built scientifically and recommended by physicians and doctors in all sections of the world, does not push into the rupture. Small, light, clean, safe and comfortable, it soft, wire-like and made of hygienic rubber retains the rupture and at the same time tends to bring the edges of the tear together. The action of the small oval is to gently close the wound, and in this way allow growth. Nature when assisted, soon repairs the damage wrought in the injured site and the result is a cure for the sufferer. The washable, sanitary feature, so necessary if cure is expected and health assured, was incorporated into this new invention.

He eliminated at once all metal springs and hard, unyielding pads. Soft washable material encircles the body and acts as a support for the small organ. There are no features in the newly perfected appliance which do not work toward the cure of the patient. Every movement of the body results in the edges of the

wound being brought closer together, reversing the action of the old style which constantly forced the edges of the wound apart.

It is so light, so comfortable that it can be worn even while asleep, so that night and day, sitting or at work, the rupture is being healed.

Thousands Healed

It is so wonder that so many people have been cured by this new discovery. A volume of letters began to flow into the office of the inventor as soon as these cures were effected. People who thought they were destined to wear a truss all their lives or submit to a dangerous operation, reported cures in a few months while cures with small children were regular occurrences.

To ascertain the truth of the reports of permanent cures by the use of the new invention, a check was taken over a period of years and letters written to hundreds who had worn the new device. The answers were amazing—the number of cures amounting to hundreds. Literally thousands, torn for years by rupture and weakened by its effects, had gained freedom from all devices by the consistent use of the new invention.

In a letter to the inventors, Mrs. Thomas Scott of 1187 15th Street, Edmonton, Alta., Canada, said: "One year ago I bought your rupture appliance for my little girl, who was three years old. She is now four and rupture has not bothered her since I put the appliance on."

Strains of Unusual Positions, Mean Nothing to Rupture Sufferers Now, as Science Has Perfected an Invention for Rupture Which Even During the Healing Stage Does Not Interfere With the Body Actions.

"I am very thankful to you and you may use this letter, as it may help some other worried sufferer."

An amazing cure was effected by C. H. Campbell, a carpenter, 16 years old, living at Fresno, N. S. Canada, who had been ruptured many years. He said:

"I am pleased to inform you that I do not need anything in connection with the appliance, for I have not worn same for the last nine months and consider myself cured of rupture."

"The rupture had not troubled me for the last four years—thanks to you and your invention. It was a God-send to me, for the doctor said there was nothing for me but the knife. I am seventy-five years old and work every day at my trade as a carpenter. You are at liberty to use this statement in any way you choose."

A brief period cured E. W. Brown of Norwich, N. Y., who stated:

"I discontinued wearing my appliance about six weeks ago and am happy to say that my rupture is entirely healed. Was examined by my doctor and pronounced cured. Considering my age, 41 years, think this is wonderful work."

"Cannot express to you just how grateful I am, for up to the time I commenced wearing your appliance was miserable every minute."

Steel Trusses Fail

A proof that spring trusses failed to effect a cure while the more modern Brooks appliance made possible a cure which even a doctor pronounced positive. The letter from Albert Poole, P. O. Box 171, Sterling, Mass., said:

"Gentlemen: I wore your grand rupture appliance for one year day and night, after which I underwent a doctor's examination. He stated I was completely cured. This examination was made in December, 1921, and I haven't worn the appliance since and have had no return of my rupture. I have had a truss all my life and it has done me no good."

A further proof that the cures are permanent ones, is verified by John Clark, Rock Mountain, Tenn., R. F. Clark, Box 24, who said:

"Your rupture appliance has cured me—I have been well for two years."

You may use my name and this letter in any way you wish, for I feel very grateful."

A sad case was disclosed when a man writing from Peoria, Illinois, gave the following statement. His name was withheld out of regard for his grief. It gives a striking example of the dangers of rupture, especially where the old-fashioned spring truss is used. The application of the new Brooks appliance might have resulted in saving the man's life. The letter from his son follows:

"Dear Mr. Brooks: I am returning the rupture appliance for refund, as my father died from strangulated hernia the day before it came."

"We tried two years ago to get him to order one of your appliances and cannot help but feel that if he had done so as we wanted him to—he would have been spared."

Thousands Healed

On file in the offices of the company are thousands of letters telling of the cures effected by this new invention and many of them full of thanks and gratitude for the cure which they had always thought impossible or too dangerous to attempt. Be convinced, are the people who now make this new invention that it will cure rupture and bring instant relief. They will allow a ten-day free trial of the new appliance. In ten days, they believe any rupture sufferer can tell whether or not it is satisfactory in his or her particular case. If it fails to give the comfort that they feel it should it can be returned.

Free Trial

The financial standing of the people who make this new perfected appliance is above reproach. They give as references, banks, merchants and express companies in the city or in practically any large city in the entire nation.

"To gamble with rupture," said a prominent scientist, "is to gamble with life itself. Trusses hamper the wearer, they many times ruin the health of children for life. To secure an appliance, which means and at the same time assists healing is wonderful and means much to mankind."

Write to the company for the name of the nearest agent or dealer. The name of the paper can be mailed to the company. Fill out the coupon and mail it today. To delay may mean permanent loss of health or even worse.

FREE TRIAL OFFER

Brooks Appliance Co.,
788 State St., Marshall, Mich.

SLATTERY SAYS OLD-TIME BALL GAME TOUGHER

MODERN SPEED WAS LACKING

No Pads, Coaches or Slouts, and But Few Reserves, When Jack Played Ball

By NICK LEATY

There's a feeling that the game of baseball is being played too fast, and that the old-time ball game was tougher. This feeling is being expressed by a former player of the game, Jack Slattery, who is now a coach at the University of California.

Slattery, who played for the New York Yankees, says that the game has become too fast and that the players are not as tough as they were in the past. He says that the game is now played with too much speed and that the players are not as tough as they were in the past.

FOR
Acid Stomach
PHILLIPS' Milk
of Magnesia

Invaded or soda hereafter take a little "Phillips Milk of Magnesia" in any time for indigestion or flat, acid, gassy stomach, and relief will come instantly.

BETTER THAN SODA

For fifty years genuine "Phillips Milk of Magnesia" has been distributed by physicians because it becomes three times as much dissolved in the stomach as a saturated solution of carbonate of soda, leaving the stomach sweet and free from all gases. Besides, it neutralizes acid fermentations in the bowels and gently urges this souring waste from the system without purging. It is far more pleasant to take than soda.

 **T**H**E** **R**E are many ways to treat a cold in the head, but only one **DIRECT** way, and that is with vapors that can be inhaled.

The easiest and most satisfying way to get these vapors is to sniff a little Vick's VapoRub well up the nose, or melt a little in a spoon or tin cup and inhale.

The medicated vapors reach immediately into every corner of the passages, soothing and healing with every breath.

For other forms of cold troubles just rub Vick's over the throat and chest at bedtime. It is then the body heat which releases these vapors.

Ask This Question; Insist on an Honest Answer:

What kind of dispute could we have with any other nation that we would be willing to submit for adjudication by the World Court of the League of Nations which we would NOT be willing now to submit to the already existing Hague Tribunal for International Arbitration—and why?

YOU Americans who still believe in the wisdom of Washington's admonition "to steer clear of permanent alliances with every portion of the foreign world," should ask this question of your friends who are advocates of our entering the World Court back door of the League of Nations. You should insist upon a categorical answer and not be satisfied with any reply that avoids the real issue.

Mitchell Verdict Should Not Stand

The "cruel and unusual punishment" inflicted on Colonel William Mitchell, of the Army Air Service, seems indefensible as the country begins to reap the rewards of his pioneer work.

Before adjourning for the holidays Congress passed the Bingham bill, the first measure to put into effect recommendations of the President's air inquiry board, headed by Dwight W. Morrow.

There never would have been any air inquiry board unless Colonel Mitchell had roused the country on our defenselessness against air attack.

The Morrow board recommended raising our naval aviation strength to a level comparable with the 5-3-3 ratio established by the Washington conference for capital ships of the United States, England and Japan.

The board asked for new assistant secretaries of aviation for army and navy so that aviation may be given adequate attention by the General Staff.

It recommended the appointment of two new brigadier generals in the Army Air Service and five air officers on the Army's General Staff; also naval aviators in the office of the chief of naval operations; higher rank to army and navy aviation officers; higher pay to officers and men for actual flying, and larger insurance for death or disability.

To foster commercial aviation the Morrow board demanded progressive extension of the air mail service. It demanded a new assistant secretary of commerce, in charge of a new bureau of air navigation, whose business will be to establish airways, air lighthouses and a weather bureau service planned to meet the needs of air commerce.

President Coolidge cannot afford to let Mitchell's service be rewarded by the sentence of five years' suspension without pay imposed by the court-martial. We believe the President will reverse the sentence.

A Regiment of Filipinos

But Their Fathers Are Our Countrymen

Governor-General Leonard Wood, of the Philippine Islands, writes us that "there are at present about two thousand five hundred children of American fathers and Filipino mothers in the Philippine Islands who have been either abandoned or who are growing up in perilous surroundings. These children show markedly American physical and mental characteristics which in a measure unfit them for the environment in which they now live."

If properly brought up, these children develop into useful and desirable citizens. Already many of them have proved successful as farmers, as nurses, as teachers. Others, for whom there has been no education, have gone down the dreary road.

And who is to blame? The fathers that deserted these children before they were born. Whose duty is it to rally to the help of the unfortunate? Clearly, the duty of the country who numbered those fathers among its citizens.

The American Guardian Association is the official organization that administers this work. Their offices are at No. 84 State Street. The Hon. W. Cameron Forbes is General Chairman. Mr. Allan Forbes, President of the State Street Trust Company, is Treasurer. The Association is in dire need of increased funds.

To the generous readers of the Boston Evening American, considering the underlying facts of the case, need it be said where charity begins?

Good Head for Public Works

James H. Sullivan Knows His Job

The people of Boston are watching their new Mayor closely during his first days in office. The success of his administration depends largely on the success of the executives whom he appoints to fill the important offices at City Hall.

For Commissioner of Public Works, Mayor Nichols has appointed a man who enjoys a national reputation as a civil engineer. James H. Sullivan has shown in the past that he CAN BUILD ROADS.

The new Commissioner of Public Works has had lifelong experience in the "fall. Among his associates he commands a reputation for honesty, intelligence and skill. To do it to LIVE UP TO HIS REPUTATION. Those who know him best believe he will.

Killing the Goose

ANOTHER BIG ECLIPSE AND A PROMISE

By Garrett P. Serviss, Noted Astronomer and Writer on Scientific Topics of Popular Interest.

THE eclipse is still going on. The great eclipse that called millions of Americans to stand awestruck in the January weeks of yesterday, and one of the great spectacles of the century, is still going on. The eclipse is still going on. The great eclipse that called millions of Americans to stand awestruck in the January weeks of yesterday, and one of the great spectacles of the century, is still going on.

It is a very interesting fact that almost exactly a year later, another great eclipse of the sun will occur. It will be the great eclipse of the sun, which will be seen from the North Pole and the South Pole.

Path of Totality

It is the eclipse of January 2, 1925, which will be seen from the North Pole and the South Pole. The path of totality will be seen from the North Pole and the South Pole. The path of totality will be seen from the North Pole and the South Pole.

Good News

It is good news for the people of the world that the eclipse of January 2, 1925, will be seen from the North Pole and the South Pole. The path of totality will be seen from the North Pole and the South Pole. The path of totality will be seen from the North Pole and the South Pole.

There will be a very interesting eclipse, an account of the picture appearing in the morning of the eclipse, and the picture appearing in the morning of the eclipse, and the picture appearing in the morning of the eclipse.

LISTEN, WORLD!

By Elsie Robinson

THE neighbors thought the Peter was a very noisy when they saw young Clark a bank account and let him start to build an automobile in the basement.

My land, hadn't that had been his enough scraps during the last three years without enduring him so he could raise more Cain? Was it three automobiles had swiped, or four? And how many times had he been on his knees for a while, when he had a bank account and build a car.

Change Treatment

And after taking a lot of tests, that's what the doctor advised. "You're a very noisy man," said the doctor. "Stop treating him as a bad boy and begin to treat him as a reasonable man. He's crazy about automobiles. All right. Let him go round in the junk shop and buy a lot of parts and build an automobile for himself. Give him some of the money and let him ask the other youngsters in."

He never had heard of anything so good in his life, and even...

THE SUNBEAM AND THE LIGHTNING

By DR. FRANK CRANE

THE best wordworth one wrote:

"The forked weapon of the skies can send illumination into deep holes.

When the mild sunbeam hath not power to pierce."

Deep in the hidden folds of a man's nature often lie subliminal, unguessed qualities and capabilities which are never seen under the mild, warm rays of favoring circumstances.

It takes the lightning of catastrophe or failure, violence or disaster to reveal these hidden powers.

It was remarked of Mark Antony, the Roman general, that if time of stress and impending disaster his true metal shone forth. He could stand anything but easy success.

The story went the rounds of the newspapers last Winter of a tramp drifting from town to town in the West, apparently a hopeless good-for-nothing.

Then came the revealing lightning.

The freight he was riding was wrecked. A crawling out, he risked his life to pull the engineer from under the overturned engine where he was in danger of being sealed to death.

Clydes S. Grant was a tanner on a little side street, where he might have remained had not the lightning of the Civil War brought forth those qualities of indomitable resolution for which he became famous.

In the depths of a mild, tender-hearted little maid of Orleans the lightning of troublous times revealed the power of a woman of Auld.

A white-faced, timid little school teacher, who hated to sell a pencil, proved the heroine of the Oklahoma school fire, last Winter, in which she lost her life.

The lightning of disaster and adversity which revealed the heroism of these spectacular examples also, "on the small and ill-fated scenes of everyday life," light up the hidden fires of heroism which men and women possess.

Heroism and suffering act as a refining element upon noble natures. They bring to light the admirable and heroic.

The soft south winds of adversity produce a race of mild, sweet, and suffering.

It is the north wind of adversity that lashes men into desperate struggles.

Through adversity are spun the strongest threads of human character.

"There is much truth in the words of the poet:

"Till that hurt and things that hurt you.

Shine the way for perfect praise.

Shout and strain and pain.

Are fierrier than the smiling days."
